Irish Transport Research Network

Proceedings of the inaugural conference of the Irish Transport Research Network

ITRN 2010

31 August - 1 September – University College Dublin, Dublin

Editor: Bidisha Ghosh
Associate Editor: Roisin Murray

FOREWARD
The Irish Transport Research Network (ITRN) is an organisation which aims to promote transportation related research in the island of Ireland. ITRN was established in late 2009 by a group of researchers based in the various universities of Republic of Ireland and Northern Ireland. The organisation was formed to promote transport teaching and research and to act as a focus for those involved in these activities in universities and institutions of higher education, government departments and industries in the island of Ireland. ITRN also aims to inform policymakers and to assist the public and private sectors to plan and develop sustainable multi-modal transport systems using best engineering design, practice and technology solutions.

ITRN organises an annual conference for academics, research graduates and transport professionals. The conference is envisaged as a platform to discuss industrial and research needs and to give researchers and professionals an opportunity to present their work. The inaugural conference of ITRN is organised in the intention to promote research in transport, and particularly in sustainable transport and to encourage networking between researchers, users and sponsors of transport research.

Bidisha Ghosh & Roisin Murray
Organising Committee

Dr. Aoife Ahern (Chair)
Prof. Aisling Reynolds
Dr. Amir Tabakovic
Dr. Brian Caulfield
Dr. Bidisha Ghosh
Ms. Roisin Murray
Mr. Hugh Finlay
Dr. Aoife Foley
Prof. Julian Hine
Table of Contents

Part 1 Public Transport

1. Bus Rapid Transit – International Practice, Characteristics and Achievements
   Brendan Finn
2. Bus Rapid Transit and Light Rail Transit Investment Alternatives for Dublin: A
   Case Study of the Lucan Corridor
   James Leahy
3. An Examination of the Feasibility of LRT or BRT in Galway
   Shane Dunny & Brian Caulfield
4. Public Perception of Ridership Attractions of Light-Rail and Bus Transit in Dublin
   Brian Dennehy & Bidisha Ghosh
5. Wider Economic Benefits and Appraisal of Rail Schemes in Ireland
   Michael Dempsey & Nigel Tapley
   James Leahy
7. Risk of Attack on Public Transport Systems
   Claire French
8. Investigating the Potential for A Circle Rail Line in Dublin
   Gerard Deenihan & Brian Caulfield

Part 2 The Future for Vehicles (Editor: Aoife Foley)

1. What Shape will The Vehicle of the Future Take?
   Thomas Murphy
2. Electric Vehicles: Infrastructure Regulatory Requirements
   Ian Winning, Aoife Foley & Brian O’Gallachoir
3. Private Car Transport and the 10% RES-T Target- Quantifying the Contribution of
   EVs and Bio-fuels
   Hannah Daly & Brian O’Gallachoir
4. The Use of Hydrogen as a Fossil Fuel Extender for Internal Combustion Engines
   James Long
5. Electric Motorbike Energy Storage
   Karl Griffin, Kevin O’Farrell, James Long, Paul Marah
Part 3 Transport & Society

1. Transport disadvantage and public transport network change in Belfast city
   Syed Murtazza Bukhari, Julian Hine, Banihan Gunay, Neale Blair
2. Teaching of Transport Planning at Third Level from an Environmental Perspective
   James Nix & James Leahy
3. Exploring the Social Dimensions of Urban Cycling Culture
   Damien O’Tuama
4. Transport for Older People in Rural Areas
   Aoife Ahern, Julian Hine

Part 4 Road Materials

1. Abatement Technologies for Road Surface Run-In
   Fabio Bacci, Sarah O’Reilly, Ger Morgan, J.J. Heffron, John O’Halloran & Aoife Foley
2. Modelling the risk of groundwater contamination from reclaimed asphalt
   Aoife Quinn, Ciaran McNally & W. Magette
3. Performance Assessment of a 14mm Stone Mastic Asphalt Containing High Quantities of Reclaimed Asphalt
   Eanna Fallon; Ciaran McNally, Amanda Gibney, Amir Tabakovic
4. Laboratory Prediction of Early Life Asphalt Surfacing Properties
   Sarah Friel, David Woodward, Alan Woodside & S. Fitzpatrick
5. Investigating the use of hydrated lime to reduce the susceptibility of cold-mix pavement materials
   Thomas Doyle; Amanda Gibney; Ciaran McNally & Amir Tabakovic

Part 5 Smarter Travel

1. Carbon from Car Transport Undermines Sustainability—A Prickly Problem
   Russell Harris
2. Walkability Means What, to Whom? Difficulties and Challenges in Defining Walkability
   Lorraine Fitzsimmons, Norah Nelson, Kevin Lyden, James Wickham, Catherine Woods
3. Cycling Promotion in a University Context-Experiences and Opportunities
   Stephen Koch
4. The Potential for Origin-Based Mobility Management Planning in the Greater Dublin Area
   David O’Connor
5. Estimating the Potential Success of Sustainable Transport Measures in a Small Town
   Seona Farrell, Waterman Boreham, David Mcnamara, Brian Caulfield
6. Unsustainable Commuting Patterns – The Legacy of the Housing Boom in Ireland
   *Brian Caulfield & Simon McDonnell*

7. A Methodological Framework for the Study of Household Residential Location Choice and Travel Behaviour
   *Zahid Sultan, Julian Hine & Jim Berry*

8. Using a Multi-Criteria Assessment Approach to Identify Key Sustainable Transport System Attributes
   *Moataz Mahmoud, Julian Hine & Banihan Gunay*

9. Irish Transport Policy and Sustainability - Delivering a Greener Transport Network
   *Alexandra Hamilton & Aoife Ahern*

10. Smarter Travel in Six European Cities – A Precedent Study
    *Kathleen Cullinane and Tom Cosgrove*

11. The Relationship between Transport Carbon Dioxide Emissions, Urban Form & Socio-Economic Characteristics for the Greater Dublin Area
    *John Carty & Aoife Ahern*

12. Transportation Scenarios – Looking Forward and Looking Back in 4 European Cities
    *James Wickham*

13. Managing Car Dependency: Review of World Cities Experiences and Lessons for the UK
    *Waseem Akram, Julian Hine & Jim Berry*

14. Exploring Land-Use Transport Interactions In The Greater Dublin Region Using The MOLAND Model
    *Harut Shahumyan, Sheila Convery & E. Casey*

---

**Part 6 Transport Safety**

1. Evaluation of Road Safety Remedial Measures and Traffic Calming of Towns and Villages on National Roads in Ireland
   *Lucy Curtis & Fiona Bohane*

2. Accidents On Rural Roads - For Better Or Worse
   *Russell Harris, James Laird & Shujie Shen*

3. Effects of Varying Entrance and Observation Angles on Retro-Reflective Road Lines
   *Simon Murray, Michael Broghan, Sean Haughey, Catherine Deegan, Simon McLoughlin*
Part 7 ICT in Transport

1. Reducing Whole Body Vibrations Levels in Off-Road, Heavy Duty Vehicles: A Case Study with Computer Modelling
   *Shaun McFadden, Mattieu Morhan & Brian Hurley*
2. Highly Dynamic, Pervasive Monitoring of Traffic Congestion Levels
   *Derek Fagan and Rene Meier*
3. Vehicle Trajectory Projection for Road Lane Detection in Image Sequences
   *Michael Broghan, Sean Haughey, Simon Murray, Conor Fitzgerald, Catherine Deegan, Simon McLoughlin*
4. Application of Digital Elevation Models to Delineate Areas of Residual Water in Highway Surfaces
   *Philip Millar and David Woodward*
5. Short-term Traffic Flow Predictions using Neutral Networks - a Comparison of Adaptive Learning Rate Algorithms
   *Stephen Dunne and Bidisha Ghosh*

Part 8 Transport & Energy

1. Identifying the Socio-Economic Characteristics of CO2 Emitters in the Greater Dublin Area
   *David McNamara & Brian Caulfield*
2. Quantifying Transport Energy Efficiency Savings
   *Emer Dennehy, Brian O’Gallachoir & Martin Howley*
3. Quantifying Displaced CO2 Emissions from Electric Vehicles in Ireland
   *Aoife Foley, Paul Leahy, Eamon McKeogh & Brian O’Gallachoir*

Part 9 Transport & Economy

1. The transport implications for Ireland of the elimination of the Milk Quota Regime in 2015
   *Carrien Quinlan, Michael Keane, Declan O’Connor, Laurence Shalloo*
2. Imposing Minimum Parking Charges at Retail Centres And Daily Minimum Rates for Car Parks in Urban Centres
   *James Nix and A. McKenna*
3. Are Parking Requirements Within the Greater Dublin Area Justified and Sustainable?
   *Margaret Rogers, Martin Rogers & Barry O’Riordan*
